## About me

I am a developer who knows how to create application frameworks.

I founded a number of open-source projects for creating micro-services, neural networks, reactive GUIs, and DSLs, which are starred 3000+ times on GitHub.

My current interests include machine learning infrastructure and the application of functional programming languages to real-world problems.

## Skills

- Hack ★5.5 Haxe ★5.5 OpenCL ★5
- DevOps ★5 ActionScript ★4
- C++ ★4 Java ★4 JavaScript ★4
- Rust ★4 OCaml ★4 Testing ★3
- C ★3 Spark ★3 Akka ★3

(\*)[The skill scale is from 0 (Fundamental Awareness) to 6 (Expert).]

## Open-source projects

- 2021-2022 **HHVM** C++/Rust/OCaml  
is Meta's virtual machine to run Hack. I ported the open source branch of HHVM to NixOS and created CI pipeline for building, testing, and packaging HHVM.
- since 2018 **Dsl.scala** Scala  
is a framework to extend Scala language features in libraries. I also ported this framework to Haskell as Control.Dsl.
- since 2016 **DeepLearning.scala** and **Compute.scala** Scala  
are libraries for creating complex neural networks.
- since 2015 **Binding.scala** Scala  
is a reactive templating language for creating web and desktop GUI.
- 2015-2016 **Microbuilder** Haxe / Scala / Java / JavaScript  
is a toolkit to build system across micro-services implemented in various languages communicating via RESTful JSON API.
- since 2012 **haxe-continuation** Haxe  
provides `async/await` syntax for Haxe.
- since 2010 **protoc-gen-as3** ActionScript3  
is a Protocol Buffers plugin for ActionScript 3.
- since 2007 other 100+ of open-source projects

## Publications

- 2017 **DeepLearning.scala 2.0: Statically Typed Neural Networks**
- 2017 **More than React**
- 2009 **Adobe Flex 3: Training from the Source** translator

## Talks

- 2017 **Deeplearning.Scala——Thoughts and practices on open source deep learning framework** DBTC
- 2017 **Monadic Deep Learning** Strange Loop
- 2017 **Neural Networks & Functional Programming** ArchData Summit · Beijing
- 2016 **More than Async** QCon · Beijing
- 2015 **Specific-domain extension in an universal language** ECUG Con

## Experience

- 2019-2022 **Meta Platforms Inc** Software Developer  
I built machine learning infrastructure to detect payment fraud and integrated it into a variety of products. Then I joined the Hack/HHVM OSS team, where I was in charge of maintaining HHVM's open-source branch.
- 2015-2019 **Thoughtworks Inc** Senior Consultant / Lead Consultant  
I maintained a number of open-source projects sponsored by ThoughtWorks. I also took the role of Consultant or Tech Lead in various delivery teams for creating mobile and web applications, as well as data platforms.
- 2014 **Shenzhen QiFun Network Corp., LTD** Chief Programmer  
I led the Q-Force Team in developing a game engine along with its related tools, and two mobile games.
- 2011-2013 **Shenzhen Putaoteng Network Technology Co., Ltd.** Co-founder  
I led the start-up team in developing a 3D side-scrolling game engine VinyHome and a social game Nan Da Nu Pei.
- 2008-2011 **NetEase, Inc.** Chief Programmer  
I participated in various product teams as a developer or the technical lead, including Zhan Guo Feng Yun (web game), Ka Pai Dui Jue (web game), Deepcold (3D game engine).
- 2007 **Beijing HiPiHi Information Technology Corp.,Ltd** Software Engineer  
I developed variant components of both client-side and server-side for a 3D virtual world, HiPiHi World.
- 2006-2007 **Beijing AutoNavi Software Co., Ltd.** Software Engineer  
As a developer, I developed some components for a 3D navigation software.

## Education

- 2002-2006 **Southwest University of Political Science and Law** Bachelor Of Laws
